

Honduras Mission District

Reaching Honduras by developing healthy leaders, who multiply committed disciples, who plant transformational churches to bring biblical restoration to Honduras and all Latin America

The churches in Honduras continue to intentionally reach out into their communities with food packages for those in need as well as spiritual guidance and prayer for many families who have turned to God during this pandemic. 4 new Houses of Peace (house church/small groups) have started because of this.

The churches have been working via zoom to continue to train and prepare pastors and leaders to continue doing God's work during this time.

Church continues to grow despite pandemic

New Life In Christ

House of Peace

In the Community Church Planting (CCP) strategy, that is being implemented all over the Latin America Area, a House of Peace is a small group of new believers who meet together and will eventually become a church.

Through the Houses of Peace we have seen lives transformed.

Nidia was searching and contacted us via Facebook. She started attending one of the Houses of Peace and soon accepted God as her savior. She has been walking with the Lord for the last two months and we have seen how God has transformed her life.

Already she is bringing others to know God.

How good it is to see a life changed by God's power!

partner

PRAY

- that God will continue to pour out wisdom, love and passion for the lost and His work.
- for the internet connections, that people will not give up meeting because of poor internet. Especially for leaders and people in the rural areas.

Give

Be a part of what God is doing in Honduras by making a financial commitment today
